- a. **Resolved to note** FoDDC Planning Enforcement have opened a case regarding the change of topography and possible dumping of spoil on the development north of Gloucester Rd. The Clerk reported that there was no further update.
- b. **Resolved to note** Bellway Homes – development north of Gloucester Road – have put in a lowered kerb as part of the footpath they have constructed. Gloucestershire Highways legal agreements team are looking into this however they have advised that if the developer has put in a dropped kerb and tactile crossing as part of their approval, it is likely that they will be carrying out the same works on the opposite side of the road. This to be discussed with Brian Watkins at visit – Councillors consider a more robust crossing should be installed.

Condition 11 – Objection
The CMS now includes paragraph 3.17 which allows for the placing of sub-soil and top soil in the Orchard area which was not in the original submission. The landscape specification of Dec 2017 stated that the subsoil would be removed from site. This paragraph appears to have been added following complaints from residents and the Parish Council about the level of soil that has been dumped in the Orchard area raising the ground level by 2 metres with one area considerably higher. This raised ground represents a lack of privacy for existing residents and raises questions regarding drainage and the effect on the ecology of the area. Councillors raised concerns about the possible effect on the listed status of Wirewoods Green Manor. The Orchard is to be a public open space for the benefit of the whole community. The Parish Council requests that the changed topography of the site should not be allowed. The CMS also restricts construction vehicles from entering Elm Road – a road sweeper lorry is parked in Elm Road daily whilst being filled with water – this should be done on site.
Condition 22 – Noted and no objection
Condition 23 – Objection
The Appeal Decision APP/P1615/W/15/3003662 states the LEMP shall also identify the legal and funding mechanism(s) by which the long-term implementation of the plan will be secured by the developer with the management body(ies) responsible for its delivery. These are not identified in the LEMP submitted and this information must be identified at this stage to assure the Parish Council that the provision is in place prior to the first house being occupied. The Parish Council has been left to

deal with problems from previous developments where these provisions have not been in place and have subsequently left residents with no recourse.
